Pushers!
Goldzone!
Wheel Deal!
Wonder Wheel!
Big Rig Truckin'!
Smoken Token Extreme!
Kookie Krazy Koin!
You Name It!

SUGGESTED INSTALLATIONS – Hopper Mount Not Included

How it Works:

The game player swipes their card at the machine. The GCE Universal Hopper Kit reads the signal from the card swipe system and dispenses a programmable number of tokens. The player plays the game and either collects tickets or the card system credits the player's card with ticket credits. The location periodically empties the coin box into the hopper. An error lamp will light if the hopper is out of tokens or does not dispense the tokens.

Kit Contents:

- Hopper
- Hopper Extension
- Hopper Control Board
